

NEGAS

447 Mueller St.

Feb. 25/39

Dear Mrs. Edelstein.

I should say the feature of Negas was that 110° or 120° bend with the 90' bank piling into it. The same bend is repeated on Overfield R. in Rowe, where Negas enters, across to the river. There the bend is all of 120° . The mountain is high. It is something that the names on that way are nearer your dialect than ours here & south.

You will remember Rash's 1885 --
the cape, point: Nicmas, Gas--

Sincerely

H.B.C.
