Dear Mrs. Fackelstein,

I am glad you saw
why the Herring book came back to
me when you were telling you was
late. Keweenaw was the same frame in
all his stories, but the clothes he puts
on the frame are so nice, & the more
or less detailed? people are so unthirsted,
that you don't mind at all. Anyway
a bird sings its song.

Really reason to run up to Seneca,
soon, & you would better not bother
with shipping my stuff - I'll collect it.

Senglecoma share two indigestibles, *Smagla*.
Conna & *Ripogonus*, affect my middle
regions. We have *Senetokomus* in R.D.,
rather a true *Senetokomus* idea: There are
some cognates & I will do it as
inner prom-strips arrive. The *Ripo-*
Ripogonus is a wild stab, but we have names
in R.D. & C, beginning *Wip-*, for crack,
rift, fissure, narrows, hollow tree.
