

I went through with one of the trustees.
I have seen no abuses there. I don't know
that there was any periodical time for
abuses.

Q. What is the prevailing disease there? Is it
consumption, disease of the lungs, affections of
the brain or dyspepsia or what? A. My
judgment is that the brain is the leading
organ in the diseases that is suffered by the
patients in the hospital. I don't know of
any particular disease other than brain
disease that predominates there. I
don't profess to know what the
leading class of physical diseases are there,^{consequently}
not the treatment.

Q. Is it your belief that for these
local and acute diseases Dr. Barlow
is as well qualified there as any man

A. I cannot tell whether Dr. Barlow
is the best man in the world or not.
It is impossible for me to tell; but I
have come to the conclusion from the
observations I made that he is well
adapted to the place he is in.
I now state I think he is very
well adapted for the place he occupies.
