

They don't help much, the personals, & these don't
match your -ish-. Auebi, begins a phrase with
a 'neghi' ^{TE HUOKO UJSAK TA}, meaning "they eat their corn green."
? corn-field idea, Auehi means as soon as Rash.
The giste form for chopp's occurs in Ojib. & Alg. & in
Rash it is gask.

I bother you with this partly because I'm no
hold on the historical side. A lot of those
village ^{villages and towns} spread ^{and} places do have field names.

I hope no more ankle twists. I had a
slight contact with a car yesterday, the fellow
needed a lecture.

Incident, and in
W.S.C.

teer - tisipan	tip
goes, manabeding	lob
broad, ishak	
the trade, mabekit	

was scattered somewhere and who knows all
plants that would not have been hit at all
, none still living

as though +, repeat not in burning wood
& insect in, either animal held to fire, & it is
burned, now - wood - wood was not
now burnable. This is yet more common a
fact in development of ground surface
