

447.

Sept. 8/38

Dear Mrs. Eckstrom,

I have your interesting letter, with its unexpected analysis, we have the name here, you know, Winthrop + R. Williams with it as we do. I mean I have supposed meant island, not that I have tried to find out, then had an idea of looking it over sometime, but then pieces of mine have put down there + report seeing one man + twenty women.

Some the mon-prefix has been the hardest to pin down of any, but seems pretty straight in your region. Also the -gan ending seems about some, though usually solid at bottom. We thought -egan pos. with the same as in Katiqskongay. Your mention of Busimis takes me back, 1901, '02. The people were likeable, if a bit too civilized
