

take their meals in the private hall  
and stay there days, but sleep out  
nights - for the want of more room,  
and the friends understand it.

Q. Do they have to be shut up  
in those rooms through the day? A. No sir.

Q. When was the heat increased in  
the lodges? A. Last fall this continuance  
of a service pipe through the night.

Q. Before then what heat was depended  
upon for the warming of the lodge room?

A. The heat radiated from the coil  
in the basement and the coils in each  
lodge hall except the upper.

Q. Was it a cold night when the trustees  
visited the lodges to find out about  
the temperature of the lodge rooms?

A. I could not tell you. I think  
they went without my knowledge.

Q. Don't remember whether it was warm  
or cold? A. No sir.

Q. Is the method of heating these lodge  
rooms now the same as it has  
been always? A. Yes, except those small  
coils in the corridor of the lower  
and second.
